RoomSense

This board was designed and built by Geppetto
Free automated documentation anytime. Design for free @ https://geppetto.gumstix.com/

No Minimum Order  Automated Supply Chain  Reduce Cost and Errors
Thanks for using Geppetto to design this board!
One Stop Design-to-Order
Simply place displays, sensors, processors, and Geppetto connects it all.
No routing needed.

## Contents

1 **Modules on Board**

1.1 Processors

1.1.1 ATSAMW25 M0+WiFi (v2) (1)

1.2 USB

1.2.1 Standard-A Plug (v7) (2)

1.3 Power

1.3.1 3.3V/1.5A Regulator (v14) (3)

1.4 Sensors

1.4.1 Humidity Sensor (v5) (4)

1.4.2 Passive Infrared (PIR) - Motion Sensor (v2) (5)

1.4.3 Barometer (v9) (6)

1.5 Lights and Switches

1.5.1 Top-side LED (v5) (7)

1.5.2 Tactile Switch (v18) (8)

2 **Module Connections Graph**

3 **Module Power Graph**
1 Modules on Board

1.1 Processors

1.1.1 ATSAMW25 M0+WiFi (v2) (1)

The Atmel SMART SAMW25 module is based on the industry leading low-power 2.4GHz IEEE 802.11 b/g/n Wi-Fi ATWINC1500 SoC (System on Chip) combined with the ARM Cortex-M0+ based microcontroller technology from Atmel.

Datasheet available at:

Requires:

- VCC_3.3 from 3.3V/1.5A Regulator (3)

Provides:

- USB_DEVICE to Standard-A Plug (2)
- I2C to:
  - Humidity Sensor (4)
  - Barometer (6)
- VLOGIC to:
  - Humidity Sensor (4)
  - Barometer (6)
  - Tactile Switch (8)
1.2 USB

1.2.1 Standard-A Plug (v7) (2)

A standard-A USB plug allows your board to be connected as a device to an external host. It can also be used to power the board off the 5V power drawn from the USB host.

The module exposes USB DEVICE on ATSAM25 M0+WiFi (1).

It supplies 5.0V to:

- 3.3V/1.5A Regulator (3)

1.3 Power

1.3.1 3.3V/1.5A Regulator (v14) (3)

This DC to DC step down regulator provides a 3.3V DC output at 1.5A needed by certain components on this board. It is capable of accepting an input voltage between 3.1 to 16V DC and output is controlled by the TI TPS6211 buck regulator.

It recieves 5.0V from Standard-A Plug (2).

The dataheet for the TPS6211 regulator is available at:

This regulator provides 3.3V to:

- ATSAM25 M0+WiFi (1)
- Humidity Sensor (4)
- Passive Infrared (PIR) - Motion Sensor (5)
- Top-side LED (7)

1.4 Sensors

1.4.1 Humidity Sensor (v5) (4)

The humidity sensor module uses the Silicon Labs Si7021-A20 humidity and temperature sensor to measure ambient humidity. The module communicates with host devices serially over I²C.

The Si7021-A20 sensor’s datasheet is available at:

**Highlights**
- Maximum resolution 0.025 \(^\circ\text{RH}\)
- Maximum temp. resolution 0.01 \(^\circ\text{C}\)
- I^2C slave address 0x40

**Connections**
The humidity sensor module is connected to I2C on ATSAMW25 M0+WiFi (1).

1.4.2 Passive Infrared (PIR) - Motion Sensor (v2) (5)

This module uses the Murata IRS-B210ST01-R1 sensor with the ON Semiconductor NCS36000 Passive Infrared (PIR) Detector Controller.

This sensor output is connected via GPIO to ATSAMW25 M0+WiFi (1).

1.4.3 Barometer (v9) (6)

The barometer module is an ultra-compact, low-power barometric pressure sensor useful for aerial vehicles. The module’s MS5611-01BA03 Barometric Pressure Sensor offers a high resolution reading, accurate to within 10 cm and is optimized for altimeter and variometer applications. It can communicate serially either over I^2C or SPI buses. At altitudes close to sea level, covering the barometer module with a light piece of foam may help to improve the accuracy of readings.

**Highlights**
- Max resolution: 0.065 mbar
- Range: 10 – 1200 mbar
- Min response time: 0.5 ms
- I^2C slave addr: 0x76

**Connections**
This module is connected to I2C on ATSAMW25 M0+WiFi (1).

Visit [http://www.meas-spec.com/downloads/MS5611-01BA03.pdf](http://www.meas-spec.com/downloads/MS5611-01BA03.pdf) for details.

1.5 Lights and Switches

1.5.1 Top-side LED (v5) (7)

The top-side LED module contains a 1608 standard size LED of a user-selected color, mounted on the top side of a Geppetto board.

The LED is active-high on PA20 from ATSAMW25 M0+WiFi (1).

1.5.2 Tactile Switch (v18) (8)

This 4.9 sq. mm pull-down touch switch provides a user input for the signal nRESET on ATSAMW25 M0+WiFi (1).
2 Module Connections Graph

Figure 1: excludes power modules
3 Module Power Graph

- **Standard-A Plug**
  - 5.0V: 2312mW

- **3.3V/1.5A Regulator**
  - 3.3V: 1000mW
  - 3.3V: 1mW
  - 3.3V: 1000mW
  - 3.3V: 33mW

- **ATSAMW25 M0+WiFi**
- **Humidity Sensor**
- **Passive Infrared (PiR) - Motion Sensor**
- **Top-side LED**
